INDEX TO VOLUME 285

January–June 1968

SUBJECT INDEX

Papers are listed under subject headings with author's names in parentheses following title of paper. Authors are listed with titles of their papers in alphabetical order in the Author Index. Entries with (BC) are Brief Communications.

A

Absorption. Radiant heating of an absorbing and scattering slab (Perez and Baldo), 424

Active networks. Resistive N-ports with K-negative elements (Weiss and Halkias), Part I: a canonical transformerless network, 13; Part II: conditions on N-port matrices, 134

Active vibration control. Continuum model study of preview effects in actively suspended long trains (Karnopp), 251

Aerodynamics. Injection or withdrawal at a plane boundary for Stokes flow with stagnation (Liu and Jasper), 307

Analytic functions. On the evaluation of functions of a real matrix (Williams), (BC), 395

Antenna observations. Cosmic static at 144 meters wavelength (Reber), 1

Applied mathematics. Application of Laplace transforms of matrix functions (Pipes), 437

Automorphism groups. A graph-theoretical model for periodic discrete structures (Turner), 52

B

Bandwidth. Dynamic stability of an axially moving band (Mote), 329

Beam analysis. Elastoplastic analysis of indeterminate beams under reversed loadings (Lin), 364

Beams. Nonlinear bending of beams with concentrated loads (Wang), (BC), 386

Bending. Bending and twisting of thick plates with a circular hole (Lee and Conlee), 377

Nonlinear bending of beams with concentrated loads (Wang), (BC), 386

Boiling heat transfer. Development and evaluation of transfer functions for nucleate, transition and film boiling (Peterson, Zaalouk and Goetze), 285

Book Reviews

Aller, Lawrence H. and D. B. McLaughlin (edited by): Stellar structure, Vol. VIII, 69

Alt, Franz L. and Morris Rubinoff (edited by): Advances in computers, Vol. 7, 240

Muetterties, Earl. L. (edited by): The chemistry of boron and its compounds, 238

Ordway, Frederick. I., III, (edited by): Advances in space science and technology, Vol. 8, 156

Patai, Saul: The chemistry of the carbonyl group, 406

Rees, D. J.: Health physics, principles of radiation protection, 73

Reimer, Ludwig: Elektronenmikroskopische untersuchungs-und praparations-methoden, 404

Robinson, N. (edited by): Solar radiation, 318

Roy, R. R. and B. P. Nigam: Nuclear physics, theory and experiment, 498

Rubin, Murry and C. E. Haller: Communication switching systems, 405

Scanlan, J. O.: Analysis and synthesis of tunnel diode circuits, 76

Book Reviews (Continued)

Seitz, F. and D. Turnbull (edited by): Solid state physics, Vol. 18, 71

Seitz, F. and D. Turnbull (edited by): Solid state physics, Vol. 19, 236

Skelland, A. H. P.: Non Newtonian flow and heat transfer, 319

Skoglund, V. J.: Similitude theory and applications, 495

Stacy, Ralph W. and Bruce Waxman (edited by): Computers in biomedical research, Vol. II, 237

Stiltz, H. L. (edited by): Aerospace telemetry, Vol. II, 399

Tauc, J. (edited by): The optical properties of solids, 157

Truesdell, C.: Six lectures on modern natural philosophy, 158

Tyson, Howel N.: Kinematics, 161

van de Kamp, Peter: Principles of astrometry, 317

Waugh, J. S. (edited by): Advances in magnetic resonance, Vol. I, 323

Werle, J.: Relativistic theory of reactions, 324

Wolf, Emil (edited by): Progress in optics, Vol. V, 72

Yariv, Amnon: Quantum electronics, 399

Boundary layer. Flexible bars subjected to arbitrary discrete loads and arbitrary conditions (Manuel and Lee), 452

Bounds for nonlinear systems. Bounds on the responses of nonlinear control systems (Iwens), 261

C

Circuit theory. A general transformation with applications to circuit theory (Murray-Lasso), 79

Circular plates. A note on the creep of variable thickness circular plates (Venkatraman and Raphael), (BC), 391

Classical mechanics. Fundamental classical and quantum dynamical theory (Rosen), 409

Coding. Pulse code modulation, past, present and future (Reeves), 243

Cosmic static. Cosmic static at 144 meters wavelength (Reber), 1

Creep. A note on the creep of variable thickness circular plates (Venkatraman and Raphael), (BC), 391

D

Decision feedback. A measure of efficiency for a class of decision feedback communication systems (Mulholland, Joshi, and Chu), 175

Differential geometry. A new orthogonal coordinate system (Snyder), (BC), 59

Differential-difference equations. A note on the solutions of certain hyperbolic differential-differences equations (Yeh), (BC), 229

Distributed parameter networks. Cascade networks of symmetrical proportional elements (Bassett), 222

Dynamics of heat transfer. Development and evaluation of transfer functions for nucleate, transition and film boiling (Peterson, Zaalouk and Goetze), 285

E

Elasticity. Elastoplastic analysis of indeterminate beams under reversed loadings (Lin), 364

Pressurization of two-layered incompressible orthotropic tubes (Shaffer), 187

Stress waves produced by impact on the surface of a plastic medium (Tsai), 204

The initial value problem in classical elasticity (Chan and Stippes), (BC), 64

Electrical engineering. On the existence of upper bounds on the performance index of nonlinear systems (McClamroch and Aggarwal), (BC), 483

Generalization of the Popov theorem (Moore and Anderson), (BC), 488

Electromagnetic theory. A new orthogonal coordinate system (Snyder), (BC), 59

Electromagnetic wave scattering. Mechanisms of polarized and depolarized scattering from a rough dielectric surface (Fung), 125

Equivalent systems. A general transformation with applications to circuit theory (Murray-Lasso), 79

F

Feedback. A measure of efficiency for a class of decision feedback communication systems (Mulholland, Joshi, and Chu), 175

On the definition and application of the sensitivity function (Kreindler), 26

Filters. Cascade networks of symmetrical proportional elements (Bassett), 222

Flow. A generalized mathematical theory and experimental verification of proportional notches (Murthy and Seshagiri), 347

Flow of fluids. Injection or withdrawal at a plane boundary for Stokes flow with stagnation (Liu and Jasper), 307

Franklin Institute

Library of The Franklin Institute: *see* main index

Meetings: *see* main index

Functions. On the evaluation of functions of a real matrix (Williams), (BC), 395

G

Graph theory. A graph-theoretical model for periodic discrete structures (Turner), 52

H

Heat transfer. Radiant heating of an absorbing and scattering slab (Perez and Baldo), 424

Hydraulic engineering. A generalized mathematical theory and experimental verification of proportional notches (Murthy and Seshagiri), 347

Hydrodynamics. Injection or withdrawal at a plane boundary for Stokes flow with stagnation (Liu and Jasper), 307

Hyperbolic equations. A note on the solutions of certain hyperbolic partial differential-differences equations (Yeh), (BC), 229

The initial value problem in classical elasticity (Chan and Stippes), (BC), 64

I

Identification theory. Identification of randomly interconnected logic nets (Ku and Wolf), 165

Integration over function spaces. Fundamental classical and quantum dynamical theory (Rosen), 409

Irreducible realizations. An algorithm for constructing irreducible realization of time invariant systems (Albertson and Womack), 110

L

Laplace transform. Application of Laplace transforms of matrix functions (Pipes), 437

Library of The Franklin Institute, New Books, 77, 162, 241, 326, 407, 500

Linear dynamical systems. An algorithm for constructing irreducible realization of time invariant systems (Albertson and Womack), 110
Linear transformations. A general transformation with applications to circuit theory (Murray-Lasso), 79
Loads. Flexible bars subjected to arbitrary discrete loads and arbitrary conditions (Manuel and Lee), 452
Elastoplastic analysis of indeterminate beams under reversed loadings (Lin), 364
Nonlinear bending of beams with concentrated loads (Wang), (BC), 386

M

Matrix functions. Application of Laplace transforms of matrix functions (Pipes), 437
Meetings of The Franklin Institute: Minutes of the Stated Meeting: December 20, 1967, 78; Annual Meeting: January 17, 1968, 163; Stated Meetings: February 21, 1968, 242; March 20, 1968, 328; April 17, 1968, 408; May 15, 1968, 500.

N

Networks, N-port. Resistive N-ports with K negative elements (Weiss and Halkias), Part I: a canonical transformerless network, 13; Part II: conditions on N-port matrices, 134
Network synthesis. Cascade networks of symmetrical proportional elements (Bassett), 222
Nonlinear filters. Some aspects of zero-memory nonlinear filtering (Thomas and Haddad), 98
Nonlinear systems. Bounds on the responses of nonlinear control systems (Iwens), 261
Generalization of the Popov theorem (Moore and Anderson), (BC), 488
On the existence of upper bounds on the performance index of nonlinear systems (McClamroch and Aggarwal), (BC), 483
Nonuniform transmission lines. Some new rc-lines with special functions for their solution (Bhattacharyya and Swamy), 297
Notches. A generalized mathematical theory and experimental verification of proportional notches (Murthy and Seshagiri), 347

O

Optimal control. Continuum model study of preview effects in actively suspended long trains (Karnopp), 251
Optimal filtering. Some aspects of zero-memory nonlinear filtering (Thomas and Haddad), 98
Optimal nonlinear systems. Some aspects of zero-memory nonlinear filtering (Thomas and Haddad), 98
Orthotropic tubes. Pressurization of two-layered incompressible orthotropic tubes (Shaffer), 187

P

Parametric resonance. Dynamic stability of an axially moving band (Mote), 329
Performance index. On the existence of upper bounds on the performance index of nonlinear systems (McClamroch and Aggarwal), (BC), 483
Periodic arrays. A graph-theoretical model for periodic discrete structures (Turner), 52
Plane-stress. Notes on elastic-plastic analysis (Tuba), 37
Plasticity. Notes on elastic-plastic analysis (Tuba), 37
Plates. A note on the creep of variable thickness circular plates (Venkatraman and Raphael), (BC), 391
Bending and twisting of thick plates with a circular hole (Lee and Conlee), 377
Popov theorem. Generalization of the Popov theorem (Moore and Anderson), (BC), 488

Q

Quantum mechanics. Fundamental classical and quantum dynamical theory (Rosen), 409

R

Radiation scattering. Radiant heating of an absorbing and scattering slab (Perez and Baldo), 424
Radio astronomy. Cosmic static at 144 meters wavelength (Reber), 1
Randomly interconnected logic nets. Identification of randomly interconnected logic nets (Ku and Wolf), 165
Random walk. On the optimization of saturating servomechanisms subjected to random disturbances (Karnopp), 475
RC-lines. Some new rc-lines with special functions for their solution (Bhattacharyya and Swamy), 297
Real matrices. On the evaluation of functions of a real matrix (Williams), (BC), 395

Resistive networks. Resistive N-ports with K negative elements (Weiss and Halkias), Part I: a canonical transformerless network, 13; Part II: conditions on N-port matrices, 134
Responses of nonlinear systems. Bounds on the responses of nonlinear control systems (Iwens), 261
Rough surface scattering. Mechanisms of polarized and depolarized scattering from a rough dielectric surface (Fung), 125

S

Scattering by rough surface. Mechanisms of polarized and depolarized scattering from a rough dielectric surface (Fung), 125
Sensitivity comparison. On the definition and application of the sensitivity function (Kreindler), 26
Servomechanism. On the optimization of saturating servomechanisms subjected to random disturbances (Karnopp), 475
Shock instability and the (e-p-v) equation of state. Properties of some Hugoniot curves associated with shock instability (Cowperthwaite), 275
Shock wave stability. Properties of some Hugoniot curves associated with shock instability (Cowperthwaite), 275
Solutions to some tapered lines. Some new re-lines with special functions for their solution (Bhattacharyya and Swamy), 297
State variable models. An algorithm for constructing irreducible realization of time invariant systems (Albertson and Womack), 110
Stochastic processes. Identification of randomly interconnected logic nets (Ku and Wolf), 165
Stress. Bending and twisting of thick plates with a circular hole (Lee and Conlee), 377
Stress-concentration. Notes on elastic-plastic analysis (Tuba), 37
Stress-strain. Stress waves produced by impact on the surface of a plastic medium (Tsai), 204
Systems analysis. On the definition and application of the sensitivity function (Kreindler), 26
Systems communication. A measure of efficiency for a class of decision feedback communication systems (Mulholland, Joshi, and Chu), 175
Systems saturation. On the optimization of saturating servomechanisms subjected to random disturbances (Karnopp), 475

T

Telecommunication system. Pulse code modulation: Past, present and future (Reeves), 243
Telephony. Pulse code modulation: Past, present and future (Reeves), 243
Thermodynamics of Hugoniot curves. Properties of some Hugoniot curves associated with shock instability (Cowperthwaite), 275
Transfer function development. Development and evaluation of transfer functions for nucleate, transition and film boiling (Peterson, Zaalouk and Goetze), 285
Tubes. Pressurization of two-layered incompressible orthotropic tubes (Shaffer), 187

V

Vehicle suspensions. Continuum model study of preview effects in actively suspended long trains (Karnopp), 251
Vibrations. Dynamic stability of an axially moving band (Mote), 329
Flexible bars subjected to arbitrary discrete loads and arbitrary conditions (Manuel and Lee), 452

W

Wave propagation. A new orthogonal coordinate system (Snyder), (BC), 59
Stress waves produced by impact on the surface of a plastic medium (Tsai), 204
The initial value problem in classical elasticity (Chan and Stippes), (BC), 64

INDEX TO VOLUME 286

July–December 1968

SUBJECT INDEX

Papers are listed under subject headings with authors' names in parentheses following title of paper. Authors are listed with titles of their papers in alphabetical order in the Author Index. Entries with (BC) are Brief Communications.

A

Algorithm. A second-order variational method for discrete-time optimal control problems (Koivo), 321

Anisotropic elasticity. A general theory of plane elastostatic dislocation problems for anisotropic media (Perkins), 16

Applied mathematics. Ultraspherical potential approximation in nonlinear symmetric free oscillations (Denman), (BC), 346

Approximation. Exponential approximation with piecewise linear error criteria (Thorp & Lewine), 308

Approximation theory. Duality and approximate controls, 114

Atmospheric electricity. The charge transferred to earth by a lightning flash (Pierce), (BC), 353

B

Ballantine Medal: Chandra Kumar Naranbhai Patel, 372

Bending-torsion coupling. Vibrations and stability of a moving band (Soler), 295

BIBO Stability. Bounded-input bounded-output stability of linear time-varying feedback systems (Chen), 123

Bio-engineering. Transient heat transfer in human skin (Richardson & Whitelaw), 169

Biomechanics. On growth phenomena in continuum mechanics (Fine), 135

Book Reviews

Weiss, Richard J.: X-ray determination of electron distributions, 95

Xanthakis, J. (edited by): Solar physics, 162

Brown Medal: Philip Newell Youtz, 373

C

Center city aerial distribution for Pittsburgh (Netsch), 463

Certificate of Merit: Varian Associates, 371

Choleski's method in structural analysis. Structural analysis by matrix decomposition (Rubinstein & Rosen), 331

Clamer Medal: Pol Edgard Duwez, 373

Committee on Science and the Arts: Abstracts of Meetings: November 8, 1967, 371; December 13, 1967, 371; January 10, 1968, 371; February 14, 1968, 371; March 13, 1968, 372; April 10, 1968, 372; May 8, 1968, 372; June 12, 1968, 373

Constants. Exact solutions for some classes of tapered re-lines (Bhattacharyya & Swamy), (BC), 355

Continuum mechanics. On growth phenomena in continuum mechanics (Fine), 135

Control. Duality and approximate controls (Rubio), 114

Control systems with hysteresis. Analysis of control systems with complex nonlinearities and transportation lag (Han & Thaler), 76

Cresson Medal: Neil Bartlett, 371

D

Descent search. Exponential approximation with piecewise linear error criteria (Thorp & Lewine), 308

Design procedures in the Bay area (Maule and Burchard), 423

Diakoptics in Japanese development (Kondo), 643

Discrete-time control problem. A second-order variational method for discrete-time optimal control problem (Koivo), 321

Dislocation. A general theory of plane elastostatic dislocation problems for anisotropic media (Perkins), 16

Dollinger Award: Abel Wolman, 373

Duality. Duality and approximation controls (Rubio), 114

Dynamic systems. On observability of stochastic discrete-time dynamic systems (Aoki), 36

E

Elastic deformations. An exact solution to the elastic deformation of a finite length hollow cylinder (Sierakowski & Sun), 99

Elasticity. An exact solution to the elastic deformation of a finite length hollow cylinder (Sierakowski & Sun), 99

Elastic waves. Singular solution near a rigid ribbon excited by plane waves (Sih), (BC), 152

Elastodynamics. Remarks on a paper by Yu Chen (Golecki), (BC), 256

Reply to the remarks of Golecki (Chen), (BC), 257

Electrical network theory. A search for a universal engineering language (Franksen), 604

A step by step derivation of Kron's equivalent circuits of electric machines (Yu), 625

Diakoptics in Japanese development (Kondo), 643

Foundations of tensor network theory (Happ), 562

Knowledge of Kron's work in the USSR (Ionkin *et al.*), 565

Modern electric machine theory (von der Embse), 612

Modern power engineering education: Outline of programs in U. S. universities (Higgins *et al.*), 650

Nonlinear analysis of transistor networks by Kron's mesh approach (Mablekos & Higgins), 572

On the application of Diakoptics to nonlinear systems (Ku), 634

On Kron's piecewise method of structural analysis (Tabarrok & Simpson), 632

Solution of large power system networks by Diakoptics (Andretitch & Brown), 647

Matrices or tensors? (Hoffmann), 557

The philosophical meaning of tensor theory (Rothman), 656

Kron's methods and the theoretical foundation of the matric computor (Honnell), 566

Ergodicity. A counter example to a generalized ergodic system (Wagner), (BC), 258

Response to the note by Wagner (Wolf), (BC), 259

F

Federal (The) role (Warburton), 377

Feedback system stability. Absolute input-output stability of feedback systems with a single time-varying gain (Bergen & Rault), 280

Feedback systems. Minimizing systems sensitivity through feedback (Porter), 225

Flow of fluids. Behavior of liquid metal stream in a transverse magnetic field (Wu & Turkdogan), 182

Forces not at coordinates in matrix methods. Structural analysis by matrix methods for forces not at the coordinates (Rubinstein), 241

Foundations of tensor network theory (Happ), 562

The Franklin Institute

Committee on Science and the Arts: *see* main index

Library of The Franklin Institute: *see* main index

Franklin Medal: Marshall Warren Nirenberg, 371

G

General mathematical systems. Algebraic basis of Heaviside operational calculus (Moore), (BC), 158

Graphs. Topological formulas and the order of complexity for networks with a nonreciprocal element (Su), 204

Growth phenomena. On growth phenomena in continuum mechanics (Fine), 135

H

Henderson Medal: Francis H. Stites, 372

Hub (A) of the new Philadelphia (Kling), 491

Human physiology. Transient heat transfer in human skin (Richardson & Whitelaw), 169

I

Impact (The) of rapid transit on Atlanta (Eplan), 387

Impedance tensor. Realization of negative impedance inverter using Kron's mesh primitive-branch approach (Mablekos & Weidmann), 59

K

Knowledge of Kron's work in the USSR (Ionkin *et al.*), 565

Kron's methods and the theoretical foundation of the matric computer (Honnell), 566

Kron Special Issue, 553

L

Large scale system science. A search for a universal engineering language (Franksen), 604

A step by step derivation of Kron's equivalent circuits of electric machines (Yu), 625
Diakoptics in Japanese development (Kondo), 643
Foundations of tensor network theory (Happ), 562
Knowledge of Kron's work in the USSR (Ionkin *et al.*), 565
Kron's methods and the theoretical foundation of the matric computer (Honnell), 566
Matrices or tensors? (Hoffmann), 557
Modern electric machine theory (von der Embse), 612
Modern power engineering education: Outline of programs in U. S. universities (Higgins *et al.*), 650
Nonlinear analysis of transistor networks by Kron's mesh approach (Mablekos & Higgins), 572
On the application of Diakoptics to nonlinear systems (Ku), 634
On Kron's piecewise method of structural analysis (Tabarrok & Simpson), 632
The philosophical meaning of tensor theory (Rothman), 656
Solution of large power system networks by Diakoptics (Andretitch & Brown), 647
Levy Medal: Karl Berger, 373
Library of The Franklin Institute, New Books, 97, 168, 268, 374
L_1 Approximation. Exponential approximation with piecewise linear error criteria (Thorp & Lewine), 308
Lightning. The charge transferred to earth by a lightning flash (Pierce), (BC), 353
Lightning discharge. The charge transferred to earth by a lightning flash (Pierce), (BC), 353
Lightning stroke. Shielding of transmission lines against lightning (Chowdhuri, Gross and Negreira), 269
Linear time-varying feedback systems. Bounded-input bounded-output stability of linear time-varying feedback systems (Chen), 123
Liquid jet streams. Behavior of liquid metal stream in a transverse magnetic field (Wu & Turkdogan), 182
Longstreth Medal: Henry C. Theuerer, 372
Los Angeles La Brea station, The (Iovin & Lumsden), 501

M

Magnetohydrodynamics. Behavior of liquid metal stream in a transverse magnetic field (Wu & Turkdogan), 182
Market east transportation mall (Childs), 451
Matrix decomposition. Structural analysis by matrix decomposition (Rubinstein & Rosen), 331
Matrix methods. Structural analysis by matrix methods for forces not at the coordinates (Rubinstein), 241
Matrix structural analysis. Structural analysis by matrix methods for forces not at the coordinates (Rubinstein), 241
Meetings of The Franklin Institute: Minutes of the State Meetings: October 16, 1968, 374; November 20, 1968, 666
Michelson Medal: Dennis Gabor, 373
Modern electric machine theory (von der Embse), 612
Modern power engineering education: Outline of programs in U. S. universities (Higgins *et al.*), 650
Moving masses (Sundberg), 509

N

Negative impedance inverter. Realization of negative impedance inverter using Kron's mesh primitive-branch approach (Mablekos & Weidmann), 59
Network theory. Realization of negative impedance inverter using Kron's mesh primitive-branch approach (Mablekos & Weidmann), 59
Newcomen Medal: Hyman George Rickover, 372
Nonlinear analysis of transistor networks by Kron's mesh approach (Mablekos & Higgins), 572
Nonlinear oscillations. Ultraspherical potential approximation in nonlinear symmetric free oscillations (Denman), (BC), 346
Nonlinear systems. Analysis of control systems with complex nonlinearities and transportation lag (Han & Thaler), 76
Nonlinear systems with random inputs. Fourier analysis on Wiener measure space (Ahmed), 143

Nonlinear transformation of stochastic processes. Fourier analysis on Wiener measure space (Ahmed), 143

Nonuniform transmission lines. Exact solutions for some classes of tapered re-lines (Bhattacharyya and Swamy), (BC), 355

O

Observability. On observability of stochastic discrete-time dynamic systems (Aoki), 36

On Kron's piecewise method of structural analysis (Tabarrok & Simpson), 632

On the application of Diakoptics to nonlinear systems (Ku), 634

Operational calculus. Algebraic basis of Heaviside operational calculus (Moore), (BC), 158

Optimization. A second-order variational method for discrete-time optimal control problems (Koivo), 321

Order of complexity. Topological formulas and the order of complexity for networks with a nonreciprocal element (Su), 204

Orientation in the transit environment (Chermayeff), 477

P

Philosophical meaning of tensor theory, The (Rothman), 656

Plane elasticity. A general theory of plane elastostatic dislocation problems for anisotropic media (Perkins), 16

Plane waves around rigid ribbon. Singular solution near a rigid ribbon excited by plane waves (Sih), (BC), 152

Popov test for time-varying system. Absolute input-output stability of feedback systems with a single time-varying gain (Bergen & Rault), 280

Potts Medal: Henrich Focke, 372

Puget Sound superferries (Eikum), 527

R

Random harmonic analysis. Fourier analysis on Wiener measure space (Ahmed), 143

Rigid ribbon excited by plane waves. Singular solution near a rigid ribbon excited by plane waves (Sih), (BC), 152

Rings. Algebraic basis of Heaviside operational calculus (Moore), (BC), 158

S

Satellites. Attitude stability of a spherical satellite (Magiros & Dennison), 193

Search for a universal engineering language (Franksen), 604

Sensitivity problem. Satisfaction of sensitivity requirements by threshold logic elements (Sheng), 1

Shielding. Shielding of transmission lines against lightning (Chowdhuri, Gross and Negreira), 269

Solution of large power system networks by Diakoptics (Andretitch & Brown), 647

Solutions of tapered lines. Exact solutions for some classes of tapered re-lines (Bhattacharyya and Swamy), (BC), 355

Spherical satellites. Attitude stability of a spherical satellite (Magiros & Dennison), 193

Stability. Attitude stability of a spherical satellite (Magiros & Dennison), 193

Bounded-input bounded-output stability of linear time-varying feedback systems (Chen), 123

Vibrations and stability of a moving band (Soler), 295

Stability of time-varying systems. Absolute input-output stability of feedback systems with a single time-varying gain (Bergen & Rault), 280

Step by step derivation of Kron's equivalent circuits of electric machines (Yu), 625

Stochastic dynamic systems. On observability of stochastic discrete-time dynamic systems (Aoki), 36

Stochastic processes. A counterexample to a generalized ergodic system (Wagner), (BC), 258

Response to the note by Wagner (Wolf), (BC), 259

Stress. An exact solution to the elastic deformation of a finite length hollow cylinder (Sierakowski & Sun), 99

Remarks on a paper by Yu Chen (Golecki), (BC), 256

Reply to the remarks of Golecki (Chen), (BC), 257

Structural analysis. Structural analysis by matrix decomposition (Rubinstein & Rosen), 331

Systems design for urban transit (Warburton), 541

System sensitivity. Minimizing system sensitivity through feedback (Porter), 225

System theory. Minimizing system sensitivity through feedback (Porter), 225

Systems with transport lag. Analysis of control systems with complex nonlinearities and transportation lag (Han & Thaler), 76

T

Tensors. Matrices or tensors? (Hoffmann), 557

Thermics. Transient heat transfer in human skin (Richardson & Whitelaw), 169

Threshold logic. Satisfaction of sensitivity requirements by threshold logic elements (Sheng), 1

Tolerance. Satisfaction of sensitivity requirements by threshold logic elements (Sheng), 1

Topological formulas. Topological formulas and the order of complexity for networks with a nonreciprocal element (Su), 204

Transmission lines. Shielding of transmission lines against lightning (Chowdhuri, Gross and Negreira), 269

Transit (The) expressway, (Prytula), 519

U

Urban design determinants in Seattle and New York (Okamoto), 401

Urban transporters as human environments (Gutman), 533

Urban transportation systems. A hub of the new Philadelphia (Kling), 491

Center city aerial distribution for Pittsburgh (Netsch), 463

Design procedures in the Bay area (Maule & Burchard), 423

Market east transportation mall (Childs), 451

Moving masses (Sundberg), 509

Orientation in the transit environment (Chermayeff), 477

Puget Sound superferries (Eikum), 527

Systems design for urban transit (Warburton), 541

The Federal role (Warburton), 377

The impact of rapid transit on Atlanta (Eplan), 387

The Los Angeles La Brea station (Iovin and Lumsden), 501

The transit expressway (Prytula), 519

Urban design determinants in Seattle and New York (Okamoto), 401

Urban transporters as human environments (Gutman), 533

V

Vibrations. Vibrations and stability of a moving band (Soler), 295

W

Wetherill Medal: Nathan Cohn, 371

AUTHOR INDEX

Full titles of papers are listed only under first authors; all co-authors are cross-referenced.
